D&H Managed Services

Be the single source for all your client's managed service needs. Organizations are looking for ways to increase efficiency, provide better security, and reduce expenses on costly business operations and infrastructure. Our team of industry experts are ready to provide your clients with the tools and services they need to work efficiently and safely from anywhere.

D&H Managed Help Desk Services

Unlimited Expert Support to Enable Work from Anywhere

The D&H Managed Help Desk Service offers 24/7 real-time assistance for end users. Our team of technology experts will provide unlimited technical support and training, install and configure antivirus software, diagnose and remove viruses, and more. Simply call or chat and we'll provide on-demand support to help solve technical issues.

Contact ProServicesCA@dandh.com or visit www.dandh.ca/Services.

D&H Managed Device Patching Services

Cost-effective, Managed Approach to Protect and Update Your Devices

Our multi-vendor patch management tool with focused staff and proven processes, deploys critical patches on your devices, ensuring compliance and protection against attacks that target these vulnerabilities. We manage the deployment and installation of security patches so that you can focus on more important business objectives.

D&H Managed Device Services

Real-time Monitoring for All Your Devices

Monitoring and Management provides anytime, anywhere monitoring for your systems coupled with powerful automated and manned response to provide meaningful remediation for detected faults, whether security or performance related.

Our agent-based approach allows for visibility on systems whether they are on or off the corporate network. As long as your device can see the Internet, you can manage it, even if the user is away from their desk.

D&H Managed Device Security Services

Protect Your Employees Wherever They Are

Traditional antivirus can no longer keep up with today's emerging insidious threats. Having a firewall is simply not enough. SentinelOne's sophisticated end point protection software combined with 24/7/365 expert monitoring delivers a complete and robust end point protection and response package. After deploying the protection software, our Security Operations Center monitors the devices 24x7 and responds to alerts that are raised, manages updates, and verifies that all devices are scanned regularly.

D&H Managed Infrastructure

Keep Your Employees Connected

Infrastructure is a costly business expense and managing it requires a large amount of time and energy. With D&H Managed Infrastructure, we provide the infrastructure services your clients need at a reduced price point. With technical support for unified communications, route/switch, carrier services, and security, our team has the skills and expertise to help your clients increase productivity and efficiency.
