

## Don't Let Downtime Cost You!

**Did You Know?** The average small enterprise stands to lose more than \$55,000 in revenue due to IT failures each year<sup>1</sup>. Our end-to-end backup and disaster recovery platform can save your organization valuable time and money by keeping your business systems and data safe and readily available.

1: IT Downtime Costs \$26.5 Billion In Lost Revenue," InformationWeek, May 24, 2011

## Disaster Can Take Many Forms

### Ransomware Attacks

Increasingly more prevalent, ransomware attacks can strike organizations of all sizes. Peace of mind comes from knowing your data is recoverable at any time.

### System Outages

Hardware, software and data centers can all fail. When they go down, your business needs stay up and running.

### Natural Disasters

Natural disasters are an unavoidable reality – and they come at a high cost to your business when key systems are damaged.

### Human Error

One of the most common threats to your business continuity is human error. This costly disaster is frequently unintentional and difficult to prevent.

## Disasters Happen. Keep Your Business Running.

Your business can't stop even when catastrophe strikes. With our chain-free, image-based backup, you can ensure that your organization's integral systems will continue to run and your company will have 24/7 access to data without disruption.

## Get Started

# Break Free from the Chains

Our solution is the only chain-free, end-to-end backup and disaster recovery (BDR) platform to protect your company's business continuity.

## What Does Chain-Free Mean?

Our chain-free, image based solution eliminates the potential of broken, unusable backups, along with the need for intrusive reseeding of your company's data. This technology significantly reduces the amount of storage required for each backup; and can **minimize the overall cost of infrastructure and time needed to have your systems running smoothly again.**

## Total Server Protection

Data, operating systems, applications, and configurations — our solution relies on a full image-based backup so everything on your server is protected.

## Recovery in Minutes, Not Weeks

Our solution can include an on-site Fast-Flash™ BDR appliance, used as a substitute server in the event of an outage, reducing downtime to the absolute minimum.

## Multiple Recovery Techniques

Regardless of whether it is a simple server outage or a site-wide disaster, we offer multiple recovery techniques, including recovery in the cloud.

## Trusted Backup Provider

Your backups can be sent off-site to secure and compliant data centers, where cloud services are backed by a 100% cloud service-level agreement (SLA).
